Desktop Alerting Solution

NetSupport Notify
Desktop Alerting Solution

NetSupport Notify delivers a **low-cost alerting** and desktop **notification solution** for any size or type of organisation or school.

Money-saving solution

OK

From **hospital** to **office** to **school** campus, there are so many different ways NetSupport Notify can be used.

Alerts can be **customised** to match an organisation/school colour scheme,

include a **company/school logo**

and/or **play custom sounds**.

NetSupport Notify
Mass notification tool

NetSupport Notify isn't just for the workplace; in fact, it was originally developed as a mass notification tool for use in schools.

For use in schools

OK

Teachers can also use NetSuppot Notify to **request assistance** with **IT issues** or help with a **challenging student**.

Company

HOSPITAL

BANK

SCHOOL

In seconds staff can **create a new alert** with a caption and supporting body text;

set a **severity level** to be shown on the alert;

choose if they want to **schedule the alert** for later, become a **recurring alert - or send it immediately**.

Alerts can then be **sent to everyone**, to **specific departments** or even just to selected individuals or devices.

You can choose whether the **message disappears** after a set period of time or you want each recipient to **acknowledge receipt**. When they do, the system records their acknowledgement on your Notification Server.

You can view all **previous alerts** too, for a full history.

STAFF

On **large information panels**, the messages will display **full screen** and you can decide how long they remain visible.

WAITING AREA

Consultation Delay
The average wait time is now 45 minutes due to an emergency.
Received Today

Emergency Room

On desktops, the message will be square and centred to **ensure it can't be missed**.
